

Snowman Shadow Box Card

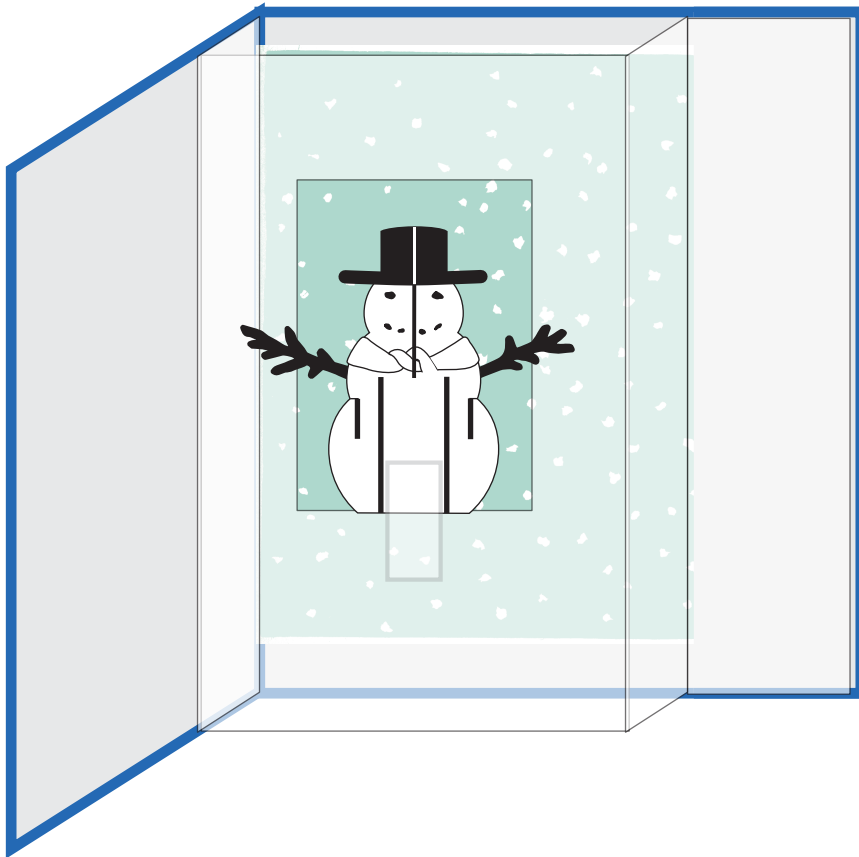

fig.1

Top
View

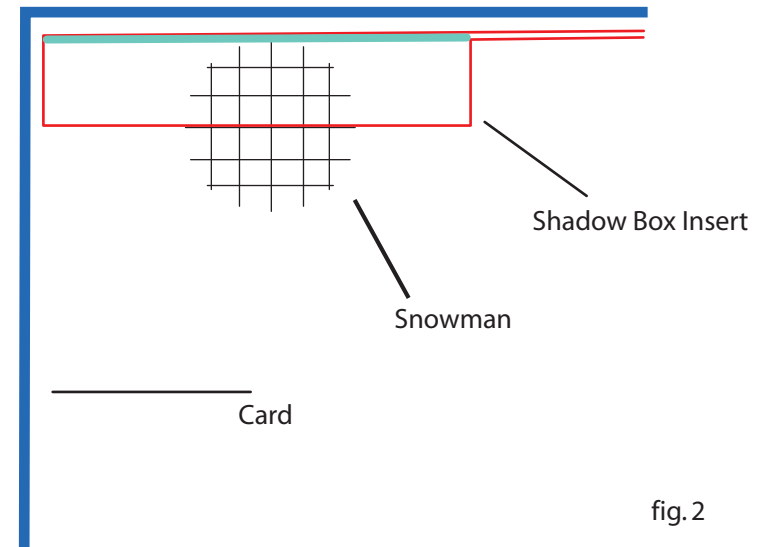

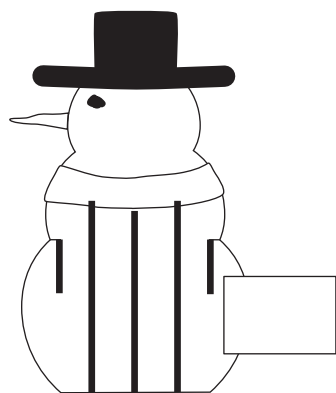

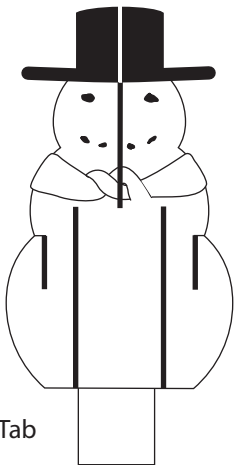

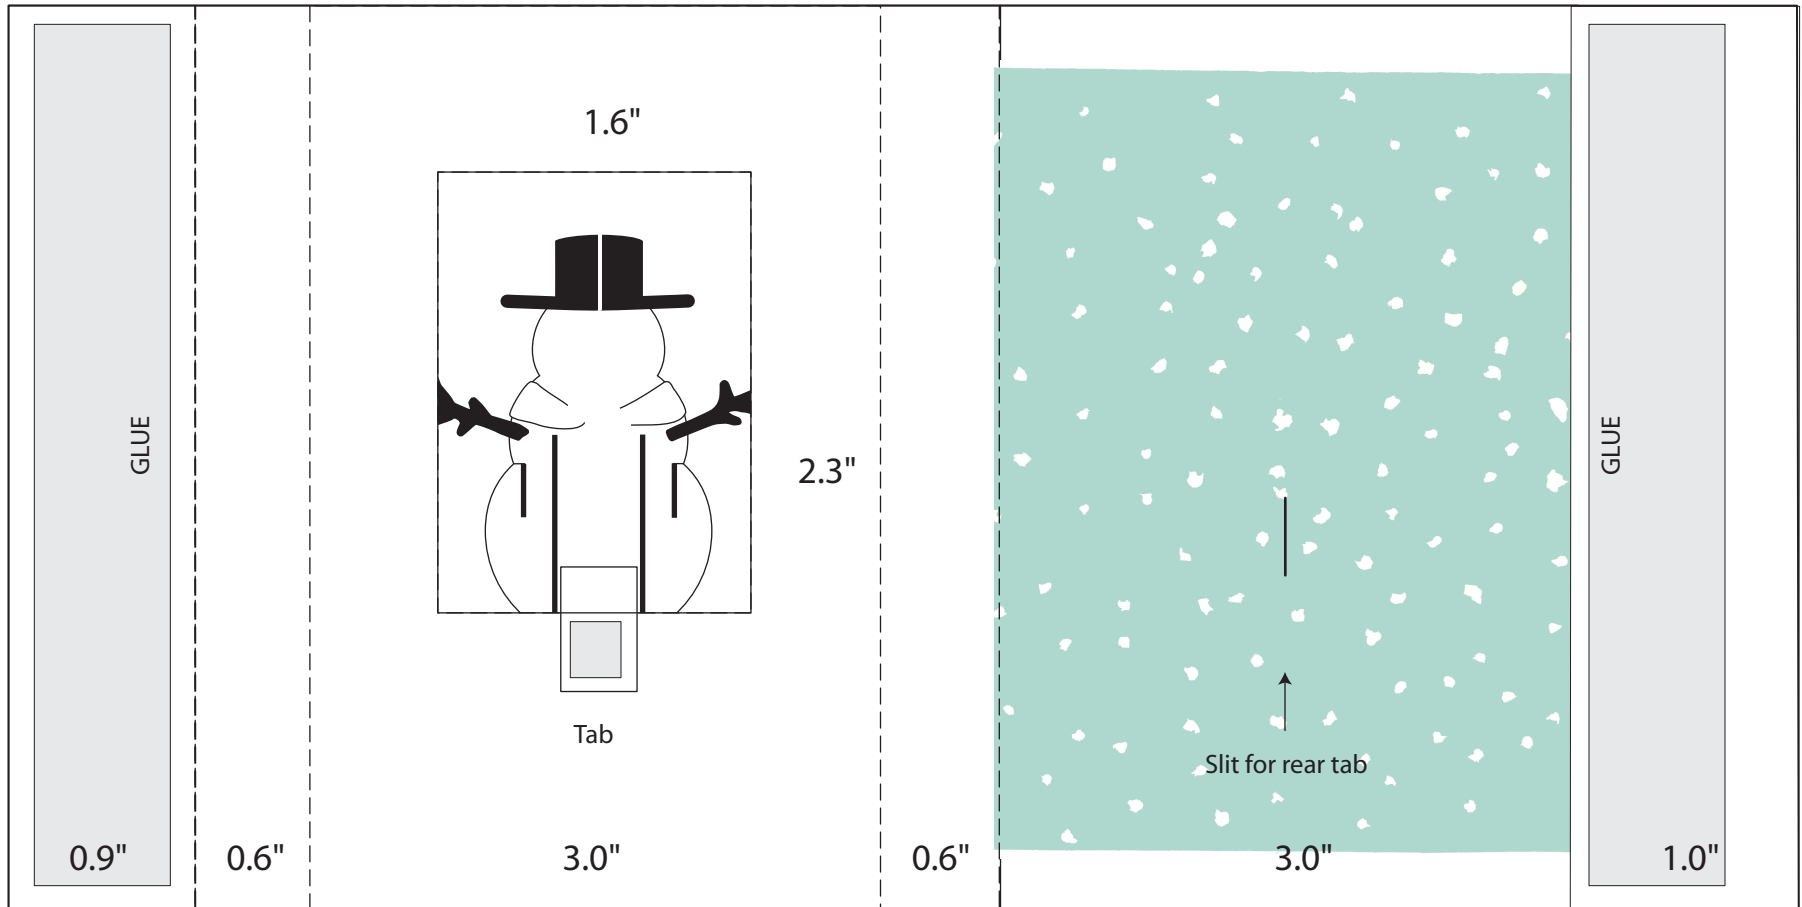

fig.2

This card consists of a shadow box insert in a commercially produced card. You can adjust the size of the insert to fit any card you like or make. The box does not extend to the right edge of the card so that it won't show when the card is closed. The depth of the card is designed to accommodate the Snowman. You can adjust this for another model such as the Cute Little Tree or Medium Star. (See Cool Project for the Medium Star for another shadow box that is the card itself.)

9.3"

4.7"

Rear Tab

- Attach the tabs to the two largest Snowman pieces.
- Assemble Snowman. Stamp, paint or print a background.
- Cut and score (dashed lines) insert.
- Fold the insert into the box shape. Make sure it will close and glue as shown.
- Glue Snowman tab behind the window.
- Fit rear tab into slit, fold over and glue in place.
- Glue the insert into a card. Be sure to attach it on the left side as well as the back so that it will open with the card.
